Thanks,

Nate Sibinga DS '07

Chair, Curriculum Committee

#### Deep Springs College

Seeks applications for the Herbert Reich Chair in the Natural Sciences

Beginning in the 2009-2010 academic year

Applications Deadline is Nov. 7th, 2008

#### The Herbert Reich Chair

This position is one of three long-term faculty positions at Deep Springs. The successful full-time candidate will teach self-designed courses within his or her area of expertise, as well as more general classes. Long-term professors exert a broad influence on the intellectual culture of this very small community. The ideal candidate may be a specialist but will also consider his or her discipline in the context of a liberal education. The teaching load is 2-2. The position is renewable up to six years.

#### About Deep Springs

Located in an isolated California desert valley, Deep Springs is the smallest and one of the most academically selective colleges in the country. Its twenty-six students receive a full scholarship for room, board, and tuition. The college aims to prepare young men for a life of service to humanity through a rigorous liberal arts curriculum, student body self-governance, and ranch labor. After two years at Deep Springs, students typically transfer to schools such as Yale, Brown, and the University of Chicago.

#### Teaching at Deep Springs

Professors at Deep Springs live on campus in faculty houses and work closely with students both inside and outside the classroom. The student-to-faculty ratio is about five to one; most classes have fewer than six students.

"Four semesters of direct contact with students at Deep Springs have taught me far more about the teaching of science than many years of delivering large lectures."

-Robley Williams, Professor Emeritus, Vanderbilt University, and Visiting Professor, Deep Springs College

"Professors at Deep Springs will find highly capable students keen to see where the rubber meets the road. Helping them explore ways to apply their classroom knowledge to concrete issues in the larger community is challenging, but immensely rewarding."

-Sam Laney, Ocean Life Institute Postdoctoral Scholar, and Visiting Professor, Deep Springs College
